PROFILE

Backend-focused software developer with experience designing and building secure REST APIs using Go, PostgreSQL, JWT authentication, and Git-based development workflows. Currently training at Zone01 Kisumu while building production-style backend systems with a focus on security, scalability, and clean architecture.

TECHNICAL SKILLS

Go (Golang), JavaScript, Python, SQL, PostgreSQL, MySQL, MariaDB, Git, GitHub, Linux, REST APIs, JWT Authentication & Authorization, Database Design & Migrations, API Design & Testing (Postman), Backend Development.

PROJECTS

Ganji — Bitcoin Escrow Platform (In Progress)

- Designed and implemented a modular backend using Go, PostgreSQL, and Gin.
- Built JWT authentication with access and refresh token support.
- Developed REST APIs for deals, artifacts, and verification workflows.
- Designed a relational database schema with hierarchical ownership validation to prevent cross-resource access.
- Implemented deal lifecycle management and secure authorization checks.
- Tested and debugged endpoints using Postman.
- Preparing Lightning Network (LNBits) integration for Bitcoin escrow payments.

TraceLock — Biometric & Inspection Management System (In Progress)

- Contributing to backend services supporting authentication, inspection workflows, and mobile integrations.
- Working with APIs, databases, debugging, and backend reliability improvements.
- Collaborating on iterative feature development within a team environment.

EXPERIENCE

Apprentice Developer — Zone01 Kisumu (2026–Present)

- Designing and implementing backend services in Go using layered architecture.
- Developing REST APIs backed by PostgreSQL with secure authentication and authorization.
- Applying Git-based collaborative workflows, debugging techniques, and database migrations.
- Participating in peer code reviews and iterative software development.

Onboarding Associate / Analyst — Lori Systems (2018–2019)

Managed onboarding data, CRM records, operational reporting, and logistics workflows.

ICT Support & Data Operations — Huduma Kenya (2016–2017)

Provided technical support, troubleshooting, data processing, reporting, and digital registration workflows.

EDUCATION

Jomo Kenyatta University of Agriculture and Technology (JKUAT)

BSc. Mathematics & Computer Science (Statistics)
