

AMON MANDELA OCHUKA

Software Engineer

Kenya • +254 705 093 062 • ochukaamon@gmail.com

GitHub: <https://github.com/Amonoff> • LinkedIn: <https://linkedin.com/in/amon-ochuka>

Backend Software Engineer with experience designing and building secure, production-oriented backend systems using Go, PostgreSQL, and RESTful APIs. Skilled in authentication and authorisation, relational database design, modular architecture, and API development. Passionate about building reliable, scalable software and continuously expanding expertise in Python and JavaScript.

Languages: Go (Golang), Python, JavaScript, SQL

Backend: REST APIs, JWT Authentication & Authorisation, Layered Architecture, Middleware, WebSockets, Database Design & Migrations

Databases: PostgreSQL, MySQL, MariaDB

Tools: Git, GitHub, Linux, Postman

SELECTED PROJECTS

Ganji — Bitcoin Escrow Platform

Tech Stack: Go • Gin • PostgreSQL • JWT • LNBits

- Designed and implemented a modular backend using Go, Gin, and PostgreSQL.
- Built secure JWT authentication and authorisation with refresh token support.
- Developed RESTful APIs supporting escrow deal lifecycle management, verification workflows, user profiles, and artifact management.
- Designed relational database schemas and ownership validation mechanisms to enforce secure resource access.
- Integrated LNBits to support Bitcoin escrow payment workflows.

TraceLock — Biometric Access Control Platform

Tech Stack: Go • Chi • PostgreSQL • JWT • WebSockets

- Developed backend services supporting authentication, credential management, access control, and permission-based workflows.
 - Developed RESTful APIs for managing users, devices, zones, active sessions, and access events.
 - Implemented JWT authentication, refresh token management, middleware, and secure authorisation mechanisms.
 - Designed relational database models with version-controlled migrations supporting scalable access management.
 - Contributed to a modular backend architecture focused on security, maintainability, and long-term scalability.
-

EXPERIENCE

Software Developer (Peer Learning Program)

Zone01 Kisumu | 2026 – Present

- Designed and implemented modular backend services in Go using layered architecture.
- Developed secure REST APIs backed by PostgreSQL with JWT-based authentication and authorisation.
- Designed relational database schemas and managed version-controlled database migrations.
- Applied Git-based collaborative workflows, debugging techniques, and peer code reviews.
- Expanding backend development expertise by building projects and strengthening proficiency in **Python** and **JavaScript** alongside Go.

Onboarding Associate / Analyst

Lori Systems | 2018 – 2019

- Managed onboarding operations, CRM records, logistics data, and operational reporting.
- Maintained data quality and supported process improvements across onboarding workflows.

ICT Support & Data Operations

Huduma Kenya | 2016 – 2017

- Provided technical support, troubleshooting, digital registration, and data processing services.
- Produced operational reports and supported ICT service delivery for public-facing systems.

EDUCATION

Jomo Kenyatta University of Agriculture and Technology (JKUAT) - Bachelor of Science in Mathematics & Computer Science (Statistics)
